two wheeled bins

It 240

It 240 Wheeled Bin in HDPE according to UNI EN 840 (UNI 10571 and DIN 30740 standard)

Body and lid of the container are of single piece design injection moulded in virgin High Density Polyethylene (HDPE) material.

Manufactured using completely recyclable high quality materials, UV stabilised, resistant to decay, frost, heat, water and most chemicals.

The container is of a smooth, no sharp edge and ergonomic wall design.

Fitted with 200 mm diameter rotating swivel wheels.

Colour choices are free from heavy metals (cadmium and lead) and toxic substances in line with current legislation.

The two rear wheels may easily be replaced and are fixed to a high quality steel zinc plated axle capable of withstanding high impact.

Moulded rear handles allow ease and stability of movement.

The lid is hinged and incorporates two front handles for ease of opening.

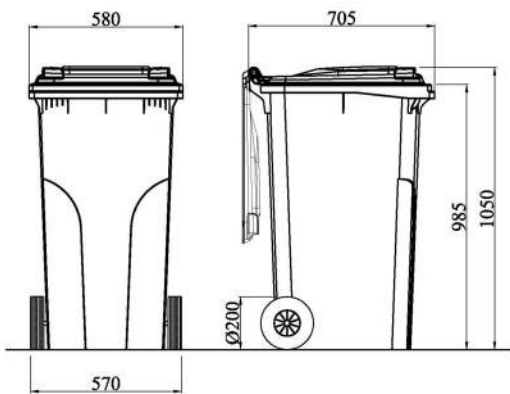

When closed the lid and lip seal prevent rain water from entering the container.

All containers are compatible with identification/weighting systems and have an RFID chip nest aperture under the front lip.

Containers can be personalised with logo's, stickers, embossed marking and serial numbering.

All Jcoplastic containers are certified to EN 840 and are GS quality certified by the independent authority LGA-GS of Nuremberg (Germany).

Standard colour green. Other colours on request.

Technical specifications

nominal volume	240	lt
tipping edge	985	mm
loading capacity	96	kg
length	705	mm
width	580	mm
height	1050	mm
wheelbase	570	mm
weight	11	kg
wheel diameter	200	mm

Customizations on request

- Foot pedal for lid operation
- Jco gravity lock with or without triangular universal key
- Jco lock with triangular key (no gravity)
- Sudhaus gravity lock

- Reflective according to class 1 or class 2
- Embossing and hot foil stamps
- Serial numbers and customized labels
- Chip installation
